A City of Palm Springs Program

California law requires cities to continuously reduce the amount of trash delivered to area landfills. The City of Palm Springs has an aggressive recycling program to help meet the state mandate. Recycling construction and demolition debris is an important component.

When you recycle debris from construction and demolition sites, you greatly reduce the impact on our landfills. You also reduce your costs, as recycling facilities charge less per ton, versus local landfills and transfer stations.

This listing was developed to help you divert construction and demolition debris from area landfills to **state approved recycling locations**. Inclusion does not constitute endorsement by the City of Palm Springs.

Acceptable Materials

What constitutes recyclable construction and demolition debris?

Any and all of the following:

- Appliances (*stoves, refrigerators, sinks, bathtubs, toilets*)
- Cardboard
- Drywall/Plaster (*drywall, gypsum, sheetrock*)
- Greenwaste/Woodwaste (*dimensional lumber, clean wood, fence boards, wood waste, tree trimmings, pallets*)
- Metals
 - Ferrous (*steel, stainless steel piping, roofing, flashing*)
 - Non-Ferrous (*aluminum, copper, brass*)
- Paving Materials (*asphalt, bricks, cinder blocks, concrete, dirt*)
- Roofing Materials

Every effort was made to ensure an accurate and up-to-date listing of recycling companies. **However, as facilities may change hours of operation and the materials they accept, please call prior to the start of your project to confirm details.**

Please note, as well, that acceptable materials and tipping fees can fluctuate with market conditions.
