

NO.	REVISIONS	APPROVED	DATE

BARE ALUMINUM BOARDER

H.I.P. SHEETING

NOTES

1. A scaled, color layout of each legend shall be submitted to the Engineer for approval prior to sign fabrication. Actual panel length shall be approved by the Engineer.
2. Sign sheeting shall be 3M H.I.P. sheeting, with green screening with 116A anti-graffitti overlay.
3. Sign panels shall be .125 GA thick aluminum flat panel blades.
4. Details of color, stile, borders, and spacing shall conform to the Standards Specification established by the latest edition of the Caltrans Standard Plans.
5. Street names shall not be abbreviated unless approved by the Engineer. Street suffixes such as Drive, Avenue, Road, Parkway or Way shall be abbreviated. "Periods" shall not be used on abbreviations.
6. Series "C" Clearview font shall be used for all text.
